

Building Stable Foundations For Accessible and Inclusive Communities.

WHO WE ARE

SHED, Inc. is a 501(c)(3) working to strengthen housing equity for low- to moderate-income residents of University City and the surrounding area. We partner with local nonprofits, faith-based organizations, academic institutions, city government, the school district, and other area service providers to fulfill our mission to build stable foundations for accessible and inclusive communities.

Through our programs, we provide home maintenance and occupied rehab in order to maintain quality affordable housing and to support home ownership. In addition, we partner with the school district to provide career pathways in the skilled trades for high school students.

We are a resident-led organization. Our primary service area is the 3rd Ward of University City, which includes the neighborhoods north of Olive Boulevard.

OUR PROGRAMS

Volunteer Home Maintenance Program

SHED acts as coordinator and leader of volunteer activities to assist residents with exterior home maintenance, including painting, yard work, and repairs.

Home Rehab Program

We seek to ensure a safe, high-quality living environment for University City residents. The program will perform more substantial exterior and interior rehab and maintenance, involving community youth for hands-on experience in construction and landscaping trades.

Youth Career Development

University City high school students will be offered career pathways in the construction/landscaping trades through in-class, volunteer, and paid employment opportunities.
